

INK JET ECO-GREEN PRINT MEDIA

DIGITAL Range

Ritrama is pleased to announce the addition of five new and innovative products to their successful Large Format Digital Sign media range.

These laminates offer converters and end users environmentally attractive alternatives to traditional vinyl based materials and the possibility of “end of life” recyclability with similar plastic waste streams based on polythene and polypropylene or PET.

These new products are fully compatible with current sign printing methods including UV screen, UV ink jet, ECO solvent and solvent and are an alternative to PVC. Moreover are free of phthalates and conform to EN 71 regulations for heavy metals.

Recommended applications:

- ✓ Advertisement and promotional signs
- ✓ Point of purchase displays, billboards
- ✓ Counter graphics
- ✓ Trade show graphics
- ✓ Window graphics
