

GLAZED WINDOW SURFACES

Communicating with the space around us

A complete range of self-adhesive solutions for design projects, for promotional purposes or for different surface decoration in commercial or private buildings: from glazed surfaces to walls and floors. All the materials in this range can be used with the main large format digital printing techniques: solvent, eco-solvent, Latex and UV ink-jet to meet all market requirements.

RITRAMA MEETING ROOM

GLAZED WINDOW SURFACES

Not only shop windows, but also entire buildings

Transparency is the keyword for decorative graphics on a glazed surface. Thanks to a series of films combined with very high transparency adhesives, the graphics stand out without having to remove the unprinted area, as it is as transparent as the glass below. A clean removal is guaranteed thanks to the high cohesion of the adhesives used. The range is completed by a perforated PVC, with which you can customize entire buildings.

PRODUCT		FACE MATERIAL			WIDTHS (cm)	LENGTHS (m)
4-GL3B-08824	RI-JET 100 AIRFLOW GLOSS CLEAR AR802 REMOVABLE WKPE140 ²	100μ	Gloss Clear	Monomeric Vinyl	137	50 - 100
