

Versatile materials for HP digital printing, used in a wide variety of applications requiring small label volumes.

HP INDIGO DIGITAL

Short print runs

Digital printing technology opens up entirely new opportunities for label converters and self-adhesive material manufacturers alike in ways never seen before. Digital printing often **allows new products to enter into the market in a versatile, high quality and cost effective manner.**

Digital printing

The range includes papers, polypropylenes and polyethylene featuring a **special top coating for digital printing to ensure a high quality colour finish.** In order to protect the printing, for all the Digital Indigo products is recommended to over varnish the printed material.

HP certifications

As part of our market research strategies and customer oriented policy, Ritrama is at the forefront of finding **flexible printing solutions to specific market requirements.** Part of the HP Indigo Digital Range has been certified by HP Indigo.
