

High quality end solutions for the labelling requirements of the pharmaceutical industry, where label identification and product marking are essential.

PHARMA

Labels key features

Pharma range products include **high tack adhesives suitable for small diameter substrates** such as syringes or phials, specific products available for sterilisation/autoclaving, high clarity top coatings and adhesives, adhesives and top coats may incorporate UV detectable agents for label dispensing and compliance with current heavy metal legislation. Materials for hanging device labels are in accordance with ISO 15010:1998.

Range variations

The range of face materials goes from coated papers to PET, PP and PE films of various gauges. White or clear films as well as matt or gloss finishes are available. Adhesives feature specialized properties such as: **ultra-clarity, UV detectable agents and solvent based adhesives for hanging devices**. According to converter requirements, Ritrama offers glassine paper or filmic liners.

Stringent requirements

The Pharma range fulfils all stringent requirements of the pharmaceutical industry, where **label identification and product marking** are essential. High performance labels for blood sample tubes; syringes; autoclavable labels and hanger labels.
