

ETCH GLASS

An innovative way to decorate glass

Etch glass films ensure an elegant appeal in glass décor when a 'frosted' surface is required. Designed to satisfy sign makers needs, they are ideal for medium to long term etch simulations.

ETCH GLASS

User-friendly technology

Etch glass self-adhesive materials are ideal for easily applied short term graphics which require ultimate clean removal on glass. Etch glass products have been designed using two new adhesives, which are at the forefront of adhesive technology for glass decoration: AR806 removable and AP923 permanent. When combined with Airflow liners, these adhesives permit to achieve a cleaner, smoother finish on glass décor surfaces. In fact, a specially coated pattern in the adhesives allows trapped air to be eliminated through special air channels, hence facilitating a faster and easier application process.

PRODUCT		FACE MATERIAL			WIDTHS (cm)	LENGTHS (m)
4-GL3C-05499	ETCH GLASS PTA AIRFLOW SILVER TRANSLUCENT AR806 REMOVABLE WKPE140	80μ	Translucent Silver	Polymeric Vinyl	122 - 152	50
4-GL3C-05126	ETCH GLASS PTA AIRFLOW SILVER TRANSLUCENT AP923 PERMANENT WKPE160	80μ	Translucent Silver	Polymeric Vinyl	122 - 152	50
4-GL3C-06237	ETCH GLASS PTF AIRFLOW SILVER TRANSLUCENT AP923 PERMANENT WKPE160	80μ	Translucent Silver	Polymeric Vinyl	122 - 152	50
4-GL3C-04813	ETCH GLASS PTF SILVER AP923 PERMANENT WK120	80μ	Translucent Silver	Polymeric Vinyl	122 - 152	50
4-GL3C-03529	ETCH GLASS PTA SILVER AP923 PERMANENT WK120	80μ	Translucent Silver	Polymeric Vinyl	122 - 152	50
4-GL3C-05366	ETCH GLASS PTAS DARK SILVER AP923 WK120	80μ	Translucent Silver	Polymeric Vinyl	122 - 152	50
