

Materials for seal & reseal labelling use in the food market to maintain products freshness as well as in the personal care for an easiest usage.

SEAL & RESEAL

Market Segments

Self-adhesive materials are becoming more and more the best choice for demanding requirements of seal & reseal applications. They are very common in the **food market to maintain products freshness once opened as well as in the personal care one, for an easiest usage.**

Wet or Dry applications

Whether the final product is at direct contact with wet elements – fragrances or alcohol– such as products for home or personal care or with dry food in the retail market – such as dried fruit or coffee, Ritrama has the right product for you!

Specific Requirements

The Ritrama range contains effective seal-reseal label solutions for all common types of flow wrap substrates. Adhesives may be specifically selected to achieve “soft” or “hard” subjective removability – dependent on the **type of flow wrap substrate.**

Moreover the adhesive of this range is ISEGA certified for direct food contact with dry and moist, non-fatty, foodstuffs.

SEAL & RESEAL
