

Variable information printing self-adhesive materials with lay flat characteristics, often the optimal choice for all printing requirements in the office and retail sectors.

UNCOATED PAPERS

High quality

A series of calendered or smooth woodfree uncoated paper where the surface sized improve their strength offering **good ink absorption, smudge resistance and excellent bonding with toners**. They also provide high print image quality and toner key.

Lay flat characteristics

Ritrama's uncoated papers with kraft liners have been designed for use in roll or custom size A4 sheets. These materials **may be used in standard low and high-speed laser printers and photocopy machines** and are also suitable for ballpoint, impact, dot matrix and continuous laser printing.

Variable information

Uncoated papers are often the optimal choice for all printing requirements in the **office and retail sectors**. In fact, variable information data is needed for continuous business forms, EDP labels, labels for general office use and many other applications.
