

Conformable self-adhesive materials to create different labelling solutions, from promotional and decorative uses as well as for specialty applications.

## VINYLS

Versatile

Even though many years passed by, vinyls continue to be a popular choice for a **wide range of self-adhesive labelling and decorative applications** – printed by normal roll label techniques.

Special features which continue to provide vinyl with a perceived advantage over OPP/PE based alternatives are conformability, chemical resistance, outdoor durability, coloured base film options and matt texture – without the need for special top coatings.

Applications

Typical applications are **wall decoration stickers; wall paper borders; ceramic tile stickers and specialty labelling.**
